WORK EXPERIENCE

Appiskey – *MERN Stack Developer*   *Dec 2020 – Present*

- My Role is to Work with Javascript frameworks and libraries to provide user-friendly websites.
- Developing SAAS-based products by applying the understanding of React JS, HTML, and CSS that helps client site performance.
- Worked on writing integration test cases with Jest and testing-library/react.
- Resolved technical problems related to code structuring, resulting in a reduction of 20% of code and systems performance with my strong Software design skills.
- Implementation of new API endpoints to provide connectivity for the distribution of functionalities.
- Guiding juniors and helping teammates on tech blockers

SoftThrive– *Jr Software Engineer*   *Dec 2019 – Nov 2020*

- Developed using React JS, HTML, CSS, and JavaScript to enhance functionality and user experience.
- Worked under the mentorship of a senior full-stack developer and collaborated on the creation of a new Node JS APIs and MongoDB schema to increase overall efficiency and transparency.
- Edited existing code to improve browser compatibility and mobile responsiveness.
- Implemented authentication and Infinite scrolling for a better user experience on the platform.
- Implementation of different payment gateways and Google Maps to provide features related to purchasing products online.

PROJECTS

Property Mapping – *React JS, React Testing Library, Redux*

- In this project I worked on creating a real estate site for property owners using React Js, my role is to work as React Js developer to apply map markers, Polygons, and radius selection with different filtration of properties.

Room Inspection – *React JS, Redux*

- Build an application to help inspectors in the inspection process with React Js.
- Implemented an image editor to mark on images for better communication between inspector and owners.

Dealmate – *React JS, Redux, Node JS, Express JS, MongoDB*

- Built an eCommerce website in React and Node to purchase products online.
- Created different seller and buyer panels with handling different role-based users.
